

Mycoplasma

Antibody determination

Mycoplasma pneumoniae IgA, IgG, IgM

Diagnostic panel:
Respiratory diseases

Clinical applications

The diagnosis of *Mycoplasma pneumoniae* infection using IgG antibodies in human serum or plasma in the general population

Antigens

Mycoplasma pneumoniae IgA, IgG

Mixture of highly specific recombinant *Mycoplasma pneumoniae* antigens.

Mycoplasma pneumoniae IgM

Purified and inactivated *Mycoplasma pneumoniae* antigen enriched with highly specific immunodominant epitopes.

Ordering information

CLIA kits

Kit	Catalogue number	Number of tests
CLIA Mycoplasma IgA	CL-MyA100	100
CLIA Mycoplasma IgG	CL-MyG100	100
CLIA Mycoplasma IgM	CL-MyM100	100

Control set

Control set CLIA	Catalogue number	Number of tests
Control set CLIA Mycoplasma IgA	CL-MyACON	2 x 20
Control set CLIA Mycoplasma IgG	CL-MyGCON	2 x 20
Control set CLIA Mycoplasma IgM	CL-MyMCON	2 x 20

CLIA kits are optimized and validated for the determination of antibodies in human serum and plasma
